

CASE STUDY

Westerton Primary School

Primary School - Yorkshire
750 Pupils - aged 3-11 years

Westerton Primary School is situated in an outer suburb of South Leeds which has grown from a small village community to a suburban commuter area. The attractive and well equipped school, built in 1988, has grown in size over the last decade and now has around 750 pupils on roll. Children with special educational needs are well catered for and OFSTED considered this to be a real strength in the school.

"We want our children to be happy, healthy, safe and successful, to believe in themselves and to make a positive mark in the community."

25 x interactive LED screen rollout & tablet integration for collaborative learning

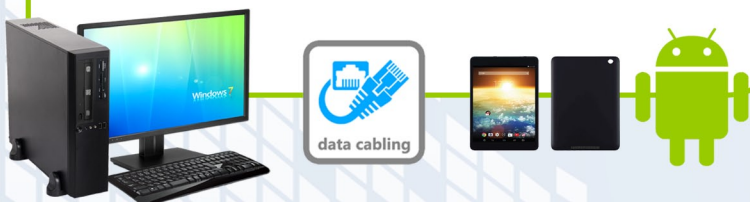

"The sales team, installers, trainer and technical support were very helpful and friendly. I have no hesitation in recommending NS Optimum"

Susan Morley - Network Manager- Westerton Primary School

PROJECT OVERVIEW

- Interactive LED Screens + Classroom Installation
- Data Cabling & Electrical Cable Installations
- Computer & Android Tablet Hardware
- Professional Training Services

PARTNERSHIP OVERVIEW

The relationship between NS Optimum & Westerton Primary School began in 2014 when the school were looking at replacing some computer hardware. After supplying the school with a number of NS Optimum computers we discussed other areas of the IT network and it became apparent that a solution to replace their existing classroom projector and whiteboard systems was required. Whilst the AV discussions continued, we supplied the school with further replacement PC workstations and in summer of 2015 NS Optimum replaced all of the schools AV systems with interactive LED screens, installed data and electrical sockets throughout the school and deployed Android tablets to integrate with the interactive LED screens, allowing full use of the collaborative classroom software.

INTERACTIVE LED SCREEN ROLLOUT

NS Optimum and Westerton Primary School started exploring options for audio visual solutions that would best suit the schools teaching practices, budget and solutions that took advantage of the latest technology. It didn't take long to realise that the Clevertouch Plus range of interactive LED screens was the right choice as they offered a useful selection of software as standard and a built in Android OS system with education apps. Following an onsite demonstration of the Clevertouch screen and associated software the decision was made and the school set about putting together the tender.

NS Optimum were awarded the tender based on cost, experience and references from local schools. Then after some extensive onsite surveys of the school, **NS Optimum installed 25 x Clevertouch LED screens** throughout every classroom in the school, making use of a variety of mounting options that suited the physical room structures as well as the teachers' requirements. Full training followed to all of the schools teaching staff.

"The pricing was extremely competitive and the installation team were fantastic. The install finished on schedule and the team left the classrooms tidy."
